Abstract
US 5299968 A UPAB: 19940517
A primary and secondary toy figure pair include a large primary figure having **hair** fibre segments secured to the head to provide a simulated head of **hair**. A secondary figure substantially smaller than the primary figure is removably securable to a necklace or other attachment supported upon the primary figure.
Hair locks include attachment tabs which facilitate removable attachment of the **hair** locks between the head of the primary figure and the secondary figure. A ring support is also securable to the secondary figure and the primary figure to support a secondary figure and provide a ring-like structure which may be worn on the child user's finger as a decorative ring.
ADVANTAGE - Provides an improved doll or toy figure play set having a more interesting and entertaining interactive play pattern and value connected with it.

Bennett

Primary and secondary toy figure pair with interchangeable hair segments

Abstract

A primary and secondary toy figure pair include a large primary figure having a plurality of hair fiber segments secured to the head thereof to provide a simulated head of hair. A secondary figure substantially smaller than the primary figure is removably securable to a necklace or other attachment supported upon the primary figure. A plurality of hair locks include attachment tabs which facilitate removable attachment of the hair locks between the head of the primary figure and the secondary figure. A ring support is also securable to the secondary figure and the primary figure to support a secondary figure and provide a ring-like structure which may be worn on the child user's finger as a decorative ring.
